

Practical First Aid for Real-Life Emergencies Involving Children

Child First Aid and Resuscitation Course

When it comes to children's safety and wellbeing, being prepared isn't *optional* — it's essential. That's why Immediate Care Training offers a hands-on, practical Child First Aid and Resuscitation Course tailored for those working with children in nurseries, creches, schools, and after-school settings.

This isn't just theory. Through interactive simulations, real-life emergency scenarios, and teamwork exercises, participants gain the confidence and skills to act swiftly and effectively when it matters most.

What the Course Covers:

- Paediatric CPR & AED – for infants and young children
- Choking Response Techniques – including infant-specific procedures
- First Aid for Everyday Injuries – such as burns, cuts, bruises, and fractures
- Recognising and Responding to Medical Emergencies – including asthma attacks, seizures, severe allergic reactions, and diabetic episodes
- Environmental Emergencies – like heat exhaustion, poisoning, and hypothermia

Whether you're a teacher, childcare worker, coach, or someone responsible for young children, this course gives you the knowledge and practical ability to respond with confidence.
